

Glossaries Language Module: glossaries-finnish

Tuomas Välimäki

Based on glossaries-*language* by Nicola Talbot

version 1.0 (2016-04-01)

This language module simply needs to be installed. The glossaries package will automatically load it if required.

1 The Code

1.1 glossaries-finnish-ascii.ldf

```
1 \@ifpackageloaded{polyglossia}%  
2 {%
```

This is unlikely to occur, since if polyglossia has been loaded then the glossaries-finnish-utf8.ldf file should've been loaded instead.
